

Zscaler Managed Services

by CentraComm

The remote workforce of today is dependent on both cloud applications and a secure connection.

By combining our highly certified security engineers with the best cloud-security solution on the market, no matter where your team is, they're both connected and protected.

CentraComm's Managed Zscaler Service leverages the threat intelligence harnessed from the Zscaler cloud. Any business, regardless of size or location, can securely connect. Zscaler is unique in that it is a multi-tenant, distributed cloud security platform built from the ground up. When paired with our proven managed services model, customers discover a dependable security resource.

Protect any user, on any device, from any location.

CentraComm's team has many years of experience implementing and maintaining Zscaler Cloud Security. Our managed service assures your team, regardless of location, will be properly set up to stay secure with Zscaler's cloud data centers across the world.

Why Managed Zscaler Services?

Secure Everywhere

Your most abundant resource is also the most vulnerable to security breaches, **your team**. Security policies are created, which enable users to stay secure regardless of their device or location.

Reduce Bandwidth

Zscaler enables customers to segment traffic based on its final destination. As a result, tremendous cost savings can be realized through web traffic optimization.

Full Management

CentraComm handles the ongoing management and monitoring, allowing you to focus on sustaining and growing your business.

Highly Scalable

By utilizing the Zscaler cloud security solution, as your team grows, your security footprint grows as well, allowing you to pay for what you use, regardless of where you are using it.

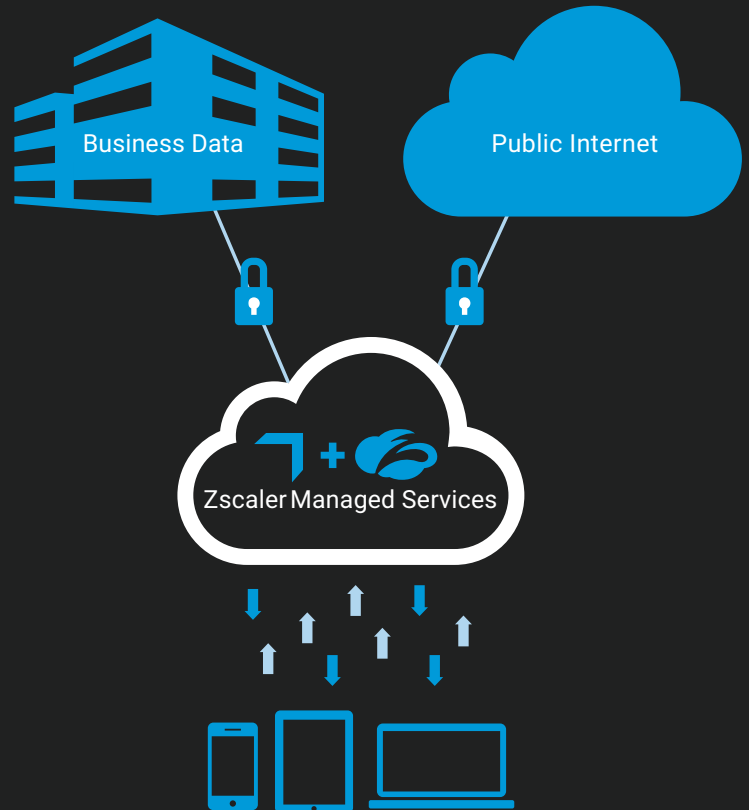

Zscaler Managed Services

by CentraComm

Simplified pricing.
 Unlimited management.
 Around-the-world security.

Our managed Zscaler service was designed to meet the ever-changing demands of our customers. You are able to budget security costs based upon the number of people on your team, allowing you the flexibility to stay secure regardless of device count. Additionally, our simplified pricing model and Zscaler engineering expertise assure that your network, your staff, and your budget remain stable and secure.
